## About Me

I am a passionate IT graduate with a strong foundation in software engineering, cloud technologies, and full-stack development. I have hands-on experience with Python, JavaScript, and SQL, and a growing understanding of AWS and Azure. I enjoy building scalable, integrated solutions while following best development practices. I am eager to contribute to innovative projects and continuously enhance my skills in backend development, cloud computing, and system integration.

## Technical And Soft Skills

**Languages:** Python, JavaScript, HTML, CSS , C, Java

**Frameworks/Tools:** React, Firebase, Docker, TensorFlow, Keras, API, Git and GitHub.

**Cloud:** Azure (Learning), AWS (Familiar).

**Databases:** MongoDB, MySQL, PostgreSQL

## Experience

### Software Engineer-Intern, Finkraft.ai

*Bangalore, India  
March 2025-Sep 2025*

- Utilized technologies such as React, Python, APIs, and Docker to build scalable FinTech features deployed in containerized environments.
- Collaborated with team members on implementing CI/CD workflows and cloud-based deployment using AWS services.
- Developed invoice data extraction systems for hotel and travel industries using refined web scraping logic.
- Collaborated cross-functionally with product managers, backend developers, and UX/UI designers to deliver intuitive user experiences.

### Operation Associate – Academics, BYJU'S

*Bangalore , India  
Nov 2021 – Aug 2023*

- Created and optimized digital content, including webpages, images, and videos using CMS tools.
- Ensured seamless academic operations by coordinating tutor replacements across centers.
- Achieved a 95% SLA compliance in resolving customer queries using Zendesk support platform.
- Developed and maintained comprehensive academic schedules to maximize resource utilization.

## Projects

### HairCare AI - ScalpSense

- Designed an AI-driven solution to analyze scalp images and detect hair fall patterns.
- Provided personalized haircare recommendations based on scalp condition and user inputs.
- Enabled users to track progress over time for better hair health management.

### Manual GST Invoice Validation Pipeline

- Developed an end-to-end pipeline for validating GST invoices by combining manual review.
- The system extracts invoice "2b" data, validates it, and provides a web-based interface for human verification.
- Integrated automated workflows for data extraction, cleaning, and verification, improving accuracy and efficiency in the validation process.

### Recipe Sharing Platform

- Built a recipe sharing platform that allows users to upload, search, and share recipes with features like ingredient-based search, user ratings, and favorites for personalized recommendations.

## Education

**Pes University** *Master of Computer Application*

*Nov 2023 – June 2025*

**Alva's Education Foundation** *Bachelor of Computer Application*

*June 2018 – Sept 2021*

## Achievements

Awarded "Stellar Performer of the Month" at BYJU'S for exceptional performance in academic operations.
